**Invigassage.com**

Our insoles provide a constant massage. The liquid filled insole flows from the heel to the ball of the foot to provide a deep tissue massage, while increasing circulation. This increase in circulation will allow you to **STAND** up to **16 HOURS** a day on hard surfaces such as cement, concrete, gravel, etc.

The free movement of the fluid will provide arch support which will improve **BALANCE** thereby aligning the body to take pressure off the back, hips, knees and neck.

Improved balance is not only positive in your daily life but will also help in a variety of activities, such as walking, running, golf and other sporting activities.

Our insoles can be placed in any sneaker, boot, sandal, flip-flop or shoe, and even high heels for greater comfort and support.

Our insoles are worn by many people from different walks of life, such as:

Military  
Health Care Workers  
Doctors and Nurses  
Construction Workers  
Police, Fire, EMS  
Teachers  
Retail and Sales Associates  
Athletes  
Chefs  
Hair Stylists

...just to name a few, who are on their feet for long periods of time or anyone who experiences foot, back, hip or knee pain.

## IMPORTANT INSTRUCTIONS

Hand or machine wash on a gentle cycle in cold water and allow to air dry.

- **DO NOT MACHINE DRY, MICROWAVE OR HEAT IN ANY MANNER.**
- Remove sand, dirt, grass, twigs, etc. on a regular basis from shoes and insoles to avoid damaging the insole.

Our insoles may be trimmed at the toe area for a better fit. **NEVER** trim the sides or at the heel. This could damage the insole and **VOID** the warranty.

Our insoles may even be placed in flip-flops when cut properly by our sales associates. If needed, double sided tape may be used to secure the insole to a flip-flop or sandal to avoid movement. The insole will not move in any other shoe or sneaker.

Due to the deep tissue massage received, diabetics may experience a tingling or burning sensation due to increased circulation. This is a **NORMAL** response and a **POSITIVE** result meaning the insole is working. Should this occur, follow the schedule below until you feel comfortable.

DAY	HOURS OF USE
1 & 2	1/2 to 1 Hour each day
3 & 4	1 to 3 Hours each day
5 & 6	3 to 5 Hours each day
7 & 8	5 to 7 Hours each day
9 & 10	7 to 10 Hours each day
11 & 12	10 to 12 Hours each day
13 & 14	12 to 14 Hours each day
